 Telephone: **847.520.1133**

This initiative provides capacity building, thought leadership, resources and handholding to program participants and helps them set and achieve Keats Manufacturing Company carbon reduction targets. Keats will quantify our carbon emissions, adopt ambitious decarbonization goals and deploy action plan to achieve it.

Reducing the operational carbon emissions in our supply chain is part of our 2021-25 sustainability goals and a concrete step towards limiting the rise of global average temperature to 1.5o C or less by 2100, as targeted by Paris Agreement.

	Base year: 2018	Most recent year: 2023
Scope 1 emissions in Tons	139	131
Scope 2 emissions in Tons	352	187
Scope 1 & 2	491	318
Turnover	33,971,179	50,033,651
Delta	- 0.56	

Our CO₂e intensity (per unit of sales) was reduced by 56% from 2018 to 2023. Our target is to reduce CO₂e intensity (per unit of sales) by 60% by 2025 from 2018 baseline.
